Changes of Climate

Kill more people than is known. Par-ticularly is this the case in instances where the constitution is delicate, and among the constitution is delicate, and among our immigrant population seeking new homes in those portions of the west, and where malarial and typhoid fevers prevail at certain seasons of the year. The best preparative for a change of climate, or of diet and water which that change necessitates, is Hostetter's Stomach Bitters, which not only fortifies the system against malaria, a variable temperature, damp and the debilitating effects of tropical heat, but is also the leading remedy for constipation, dyspepsia, liver complaint, bodily troubles specially apt to attack emigrants and visitors to regions near the equator, mariners and tourists. Whether used as a safeguard by sea voyagers, travelers by land, minors, or of agriculturalists in newly populated districts, this fine specific has elicited the most favorable testimony.
